<b>Approx: 7 weeks</b>	<b>Approx: 7 weeks</b>	<b>Approx: 6 weeks</b>	<b>Approx: 6 weeks</b>	<b>Approx: 6 weeks</b>	<b>Approx: 7 weeks</b>

Autumn Term 1

<b>Year 12 - Paper 1 – Exercise Physiology</b>	<b>Year 12 - Paper 2 – Sports Psychology</b>	<b>Year 12 - Paper 3- Contemporary issues in physical activity &amp; sport</b>
<p><b><u>Skeletal and Muscular Systems</u></b></p> <p>1. Joints, movements and muscles</p> <ul style="list-style-type: none"> <li>• Shoulder:               <ul style="list-style-type: none"> <li>- Flexion, extension, abduction, adduction, horizontal flexion/ extension, medial and lateral rotation, circumduction</li> <li>- Deltoid, latissimus dorsi, pectoralis major, trapezius, teres minor</li> </ul> </li> <li>• Elbow:               <ul style="list-style-type: none"> <li>- Flexion, extension</li> <li>- Biceps brachii, triceps brachii</li> </ul> </li> <li>• Wrist:               <ul style="list-style-type: none"> <li>- Flexion, extension</li> <li>- Wrist flexors, wrist extensors</li> </ul> </li> <li>• Hip:               <ul style="list-style-type: none"> <li>- Flexion, extension, abduction, adduction, medial and lateral rotation</li> <li>- Iliopsoas, gluteus maximus, medius and minimus, adductor longus, brevis and magnus</li> </ul> </li> <li>• Knee:               <ul style="list-style-type: none"> <li>- Flexion, extension</li> <li>- Hamstring group: biceps femoris, semi-membranosus, semi-tendinosus</li> <li>- Quadriceps group: rectus femoris, vastus lateralis, vastus intermedius and vastus medialis</li> </ul> </li> </ul>	<p><b><u>Individual Differences</u></b></p> <p>1. Personality</p> <ul style="list-style-type: none"> <li>• Definition of personality</li> <li>• Theories of personality:               <ul style="list-style-type: none"> <li>- Trait (extroverts/introverts; stable/unstable; Type A/Type B)</li> <li>- Social learning</li> <li>- Interactionist</li> </ul> </li> </ul> <p>2. Attitudes</p> <ul style="list-style-type: none"> <li>• Definition of attitude</li> <li>• Factors affecting attitude formation</li> <li>• Components of attitude: cognitive; affective; behavioural</li> <li>• Methods of attitude change: persuasive communication &amp; cognitive dissonance</li> </ul> <p>3. Motivation</p> <ul style="list-style-type: none"> <li>• definitions of: intrinsic motivation &amp;</li> </ul>	<p><b><u>Emergence &amp; Evolution of sport</u></b></p> <p>1. Socio-cultural factors</p> <ul style="list-style-type: none"> <li>• Definition of social</li> <li>• Definition of cultural</li> </ul> <p>2. Identify the 7 socio-cultural factors:</p> <ul style="list-style-type: none"> <li>• Social class</li> <li>• Gender</li> <li>• Time &amp; money</li> <li>• Transport</li> <li>• Law and order</li> <li>• Education and literacy</li> <li>• Influence of public schools</li> </ul> <p>3. Mob football in pre-industrial Britain</p> <ul style="list-style-type: none"> <li>• Which social class?</li> </ul>

## Key Stage 5 Curriculum Map 2018-19

<ul style="list-style-type: none"> <li>• Ankle:             <ul style="list-style-type: none"> <li>- Dorsi flexion, plantar flexion</li> <li>- Tibialis anterior, soleus, gastrocnemius</li> </ul> </li> <li>• Planes of movement:             <ul style="list-style-type: none"> <li>- frontal</li> <li>- transverse</li> <li>- sagittal</li> </ul> </li> <li>2. Functional roles of muscles and types of contraction             <ul style="list-style-type: none"> <li>• Roles of muscles:                 <ul style="list-style-type: none"> <li>- agonist</li> <li>- antagonist</li> <li>- fixator</li> </ul> </li> <li>• Types of contraction:                 <ul style="list-style-type: none"> <li>- isotonic</li> <li>- concentric</li> <li>- eccentric</li> <li>- isometric</li> </ul> </li> </ul> </li> <li>3. Analysis of movement             <ul style="list-style-type: none"> <li>• Analyse movement with reference to:                 <ul style="list-style-type: none"> <li>- joint type</li> <li>- movement produced</li> <li>- agonist and antagonist muscles involved</li> <li>- type of muscle contraction taking place.</li> </ul> </li> </ul> </li> <li>4. Skeletal muscle contraction             <ul style="list-style-type: none"> <li>• Structure and role of motor units in skeletal muscle contraction</li> <li>• Nervous stimulation of the motor unit:                 <ul style="list-style-type: none"> <li>- motor neuron</li> <li>- action potential</li> </ul> </li> </ul> </li> </ul>	<p style="text-align: center;">extrinsic motivation</p> <ul style="list-style-type: none"> <li>• Uses and effects of: intrinsic motivation &amp; extrinsic motivation</li> </ul> <p>4. Arousal</p> <ul style="list-style-type: none"> <li>• Definition of arousal</li> <li>• Effects of arousal: drive theory; inverted U theory; catastrophe theory</li> </ul> <p>5. Anxiety</p> <ul style="list-style-type: none"> <li>• Definition of anxiety</li> <li>• Types of anxiety: state and trait</li> <li>• Response to anxiety: somatic and cognitive; zone of optimal functioning.</li> </ul> <p>6. Aggression</p> <ul style="list-style-type: none"> <li>• Definition of aggression</li> <li>• Theories of aggression: instinct; social learning; frustration-aggression hypothesis; aggressive cue hypothesis</li> </ul> <p>7. Social Facilitation</p> <ul style="list-style-type: none"> <li>• Definition of social facilitation and social inhibition</li> </ul>	<ul style="list-style-type: none"> <li>• Which gender?</li> <li>• What about rules? (law and order /education)</li> <li>• When played? (availability of time)</li> <li>• How was it played? (availability of money, law and order, education)</li> <li>• Where and how often was it played? (availability of time and transport)</li> <li>• Give real-life examples of mob football</li> </ul> <p>4. Background of popular recreation in pre-industrial Britain</p> <ul style="list-style-type: none"> <li>• Sport and pastimes reflected society and the life people at the time led.</li> <li>• Social class system influenced everything</li> <li>• Role of the church was important at the time</li> <li>• Peasants led a tough life and had very little free time</li> <li>• Drinking public houses were a hub for socialising and activities</li> <li>• Activities that existed at this time were: bear baiting, cock fighting, dog fighting, billiards,</li> </ul>
---	---	---

### Key Stage 5 Curriculum Map 2018-19

<ul style="list-style-type: none"> <li>- neurotransmitter</li> <li>- 'all or none' law.</li> </ul> <p>5. Muscle contraction during exercise of differing intensities and during recovery</p> <ul style="list-style-type: none"> <li>• Muscle fibre types:             <ul style="list-style-type: none"> <li>- slow oxidative</li> <li>- fast oxidative glycolytic</li> <li>- fast glycolytic recruitment of different fibre types during exercise of differing intensities and during recovery.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• The effect of an audience on: introverts/extroverts; beginners/experts; simple/complex skills; gross/fine skills</li> <li>• Evaluative apprehension</li> <li>• Strategies to minimise social inhibition.</li> </ul>	<p>bowls and skittles.</p> <ul style="list-style-type: none"> <li>• Country pursuits such as hunting, coursing (chasing hares) and shooting were done by the upper classes.</li> <li>• Militaristic activities such as archery and fencing also grew at this time.</li> </ul>
---	--	---

Autumn 2

Paper 1 – Exercise Physiology	Year 12 - Paper 2 – Sports Psychology	Year 12 - Paper 3- Contemporary issues in physical activity & sport
<p><b><u>Cardiovascular and Respiratory Systems</u></b></p> <p>1. Cardiovascular system at rest</p> <ul style="list-style-type: none"> <li>• The relationship between, and resting values for:             <ul style="list-style-type: none"> <li>- heart rate</li> <li>- stroke volume</li> <li>- cardiac output</li> <li>- methods of calculating the above</li> </ul> </li> <li>• Cardiac cycle:             <ul style="list-style-type: none"> <li>- diastole</li> <li>- systole</li> </ul> </li> <li>• Conduction system of the heart linked to the</li> </ul>	<p><b><u>Group and Team Dynamics in Sport</u></b></p> <p>1. The formation of groups and sports teams using stages of group development:</p> <ul style="list-style-type: none"> <li>• forming</li> <li>• storming</li> <li>• norming</li> <li>• performing</li> </ul> <p>2. Steiner's model of group effectiveness</p>	<p><b><u>Popular recreation in pre-industrial Britain</u></b></p> <ul style="list-style-type: none"> <li>• <b>Natural/simple:</b> lack of technology, lack of purpose-built facilities, lack of money for majority of population.</li> <li>• <b>Rural:</b> Prior to industrial revolution, Britain was mainly rural and agricultural.</li> <li>• <b>Simple unwritten rules:</b> organisation was basic, literacy was poor and results and rules were passed on by word of mouth, no NGBs had been</li> </ul>

## Key Stage 5 Curriculum Map 2018-19

<p>cardiac cycle.</p> <p>2. Cardiovascular system during exercise of differing intensities and during recovery</p> <ul style="list-style-type: none"> <li>• Effects of different exercise intensities and recovery on:             <ul style="list-style-type: none"> <li>- heart rate</li> <li>- stroke volume</li> <li>- cardiac output</li> <li>- methods of calculating the above</li> </ul> </li> <li>• Redistribution of cardiac output during exercise of differing intensities and during recovery:             <ul style="list-style-type: none"> <li>- vascular shunt mechanism</li> <li>- role of the vasomotor centre</li> <li>- role of arterioles</li> <li>- role of pre-capillary sphincters</li> </ul> </li> <li>• mechanisms of venous return during exercise of differing intensities and during recovery regulation of heart rate during exercise:             <ul style="list-style-type: none"> <li>- neural factors</li> <li>- hormonal factors</li> <li>- intrinsic factors.</li> </ul> </li> </ul> <p>3. Respiratory system at rest</p> <ul style="list-style-type: none"> <li>• Relationship between resting values for:             <ul style="list-style-type: none"> <li>- breathing frequency</li> <li>- tidal volume</li> <li>- minute ventilation</li> </ul> </li> <li>• Methods of calculating the above mechanics of breathing at rest and the muscles involved:             <ul style="list-style-type: none"> <li>- diaphragm</li> <li>- external intercostals</li> <li>- at the alveoli</li> </ul> </li> </ul>	<p>3. Ringelmann effect and social loafing.</p> <p><b><u>Leadership in Sport</u></b></p> <ol style="list-style-type: none"> <li>1. Characteristics of effective leaders</li> <li>2. Emergent or prescribed leaders</li> <li>3. Leadership styles;             <ul style="list-style-type: none"> <li>• autocratic</li> <li>• democratic</li> <li>• laissez-faire</li> </ul> </li> <li>4. Theories of leadership;             <ul style="list-style-type: none"> <li>• trait perspective</li> <li>• social learning</li> <li>• interactionist</li> </ul> </li> <li>5. Chelladurai's multi-dimensional model of sports leadership.</li> </ol>	<p>formed.</p> <ul style="list-style-type: none"> <li>• <b>Local:</b> Limited transport and communication meant that sport had to be local. It wasn't until newspapers were created that sport became widely advertised and promoted.</li> <li>• <b>Cruel/violent:</b> reflected harshness of society at time.</li> <li>• <b>Occasional:</b> generally took part as part of holy days, village fairs or Christmas celebrations.</li> <li>• <b>Courtly:</b> affected by the two class system.</li> <li>• <b>Occupational:</b> work often became the basis for sport. E.g. competitive rowing came out of Thames ferryman racing</li> <li>• <b>Wagering:</b> was an obsession. For wealthy, betting was a display of financial and social status.</li> </ul> <p><b><u>Post-1850 Industrial Britain</u></b></p> <ol style="list-style-type: none"> <li>1. Social class             <ul style="list-style-type: none"> <li>• Upper/lower vs. upper/middle/working</li> <li>• Professionalism &amp; amateurs</li> </ul> </li> <li>2. Time &amp; transport</li> </ol>
--	---	---

### Key Stage 5 Curriculum Map 2018-19

<ul style="list-style-type: none"> <li>- at the muscles.</li> </ul> <p>4. Respiratory system during exercise of differing intensities and during recovery</p> <ul style="list-style-type: none"> <li>• Effects of differing intensities of exercise and recovery on:             <ul style="list-style-type: none"> <li>- breathing frequency</li> <li>- tidal volume</li> <li>- minute ventilation</li> </ul> </li> <li>• Mechanics of breathing during exercise of differing intensities and during recovery, including additional muscles involved:             <ul style="list-style-type: none"> <li>- inspiration – sternocleidomastoid, pectoralis minor</li> <li>- expiration – internal intercostals, rectus abdominis.</li> </ul> </li> <li>• Regulation of breathing during exercise of different intensities and during recovery             <ul style="list-style-type: none"> <li>- neural control</li> <li>- chemical control</li> </ul> </li> <li>• Effect of differing intensities of exercise and recovery on gas exchange at the alveoli and at the muscles             <ul style="list-style-type: none"> <li>- changes in pressure gradient</li> <li>- changes in dissociation of oxyhaemoglobin.</li> </ul> </li> </ul>		<ul style="list-style-type: none"> <li>• Changes</li> <li>• Railways</li> </ul> <p>3. Sport in post-1850 industrial Britain was increasingly:</p> <ul style="list-style-type: none"> <li>• Urban</li> <li>• Regular</li> <li>• Regional</li> <li>• With written rules</li> <li>• More controlled/sophisticated/respectable</li> <li>• Less wagering</li> </ul> <p>4. Gender: changing status of women.</p> <p>5. Availability of money</p> <p>6. Law and order</p> <p>7. Education and literacy</p>
---	--	---

## Key Stage 5 Curriculum Map 2018-19

Spring 1

Paper 1 – Exercise Physiology	Year 12 - Paper 2 – Skill Acquisition	Year 12 - Paper 3- Contemporary issues in physical activity & sport
<p><b><u>Energy for Exercise</u></b></p> <ol style="list-style-type: none"> <li>1. Adenosine Triphosphate (ATP) and energy transfer <ul style="list-style-type: none"> <li>• ATP as ‘energy currency’</li> <li>• Principle of energetically coupled reactions: <ul style="list-style-type: none"> <li>- breakdown of ATP to ADP (Adenosine Diphosphate) + P (phosphate)</li> <li>- resynthesis of ATP from ADP + P.</li> </ul> </li> </ul> </li> <li>2. Energy systems and ATP resynthesis <ul style="list-style-type: none"> <li>• Energy systems: <ul style="list-style-type: none"> <li>- ATP-PC (Phosphocreatine) system</li> <li>- glycolytic system</li> <li>- aerobic system</li> </ul> </li> <li>• For each system: <ul style="list-style-type: none"> <li>- type of reaction (aerobic or anaerobic)</li> <li>- chemical or food fuel used</li> <li>- specific site of the reaction</li> <li>- controlling enzyme</li> <li>- ATP yield</li> <li>- specific stages within the system</li> <li>- by-products</li> </ul> </li> </ul> </li> <li>3. ATP resynthesis during exercise of differing</li> </ol>	<p><b><u>Classification of skills</u></b></p> <ul style="list-style-type: none"> <li>• Justification of placement of skills on continua: <ul style="list-style-type: none"> <li>- difficulty (simple/complex)</li> <li>- environmental influence (open/closed)</li> <li>- pacing (self-paced/externally paced)</li> <li>- muscular involvement (gross/fine)</li> <li>- continuity (discrete/serial/continuous)</li> <li>- organisation (low/high).</li> </ul> </li> </ul> <p><b><u>Types and methods of practice</u></b></p> <ol style="list-style-type: none"> <li>1. Characteristics and uses of each: <ul style="list-style-type: none"> <li>- part practice</li> <li>- whole practice</li> <li>- whole/part-whole practice</li> <li>- progressive/part practice</li> <li>- massed practice</li> <li>- distributed practice</li> <li>- fixed practice</li> <li>- varied practice</li> </ul> </li> <li>2. Transfer of skills <ul style="list-style-type: none"> <li>• Types of transfer: <ul style="list-style-type: none"> <li>- positive</li> <li>- negative</li> <li>- proactive</li> </ul> </li> </ul> </li> </ol>	<p><b><u>Influence of public schools:</u></b></p> <ul style="list-style-type: none"> <li>• The promotion and organisation of sports and games.</li> <li>• The promotion of ethics through sports and games.</li> <li>• The cult of athleticism.</li> <li>• The spread and export of games and the game ethic.</li> <li>• Thomas Arnold</li> </ul> <p><b><u>20<sup>th</sup> Century Sport</u></b></p> <ol style="list-style-type: none"> <li>1. Many developments took place during the 20<sup>th</sup> century in the UK: <ul style="list-style-type: none"> <li>• There was a massive development of scientific and technological innovation.</li> <li>• Many societies became hugely rich, but wealth was still unequally shared.</li> <li>• There was considerable growth of cities (urbanisation).</li> </ul> </li> </ol>

## Key Stage 5 Curriculum Map 2018-19

<p>intensities and durations</p> <ul style="list-style-type: none"> <li>• The energy continuum</li> <li>• Predominant energy system used during exercise:             <ul style="list-style-type: none"> <li>- how intensity and duration of exercise influence which energy system is predominantly used to resynthesise ATP</li> <li>- interpretation of figures relating to the contribution of the three energy systems to exercise of different intensities and durations</li> </ul> </li> <li>• Interplay of energy systems during intermittent exercise and factors that affect this interplay             <ul style="list-style-type: none"> <li>- intensity of exercise</li> <li>- duration of exercise</li> <li>- recovery periods</li> <li>- fitness levels.</li> </ul> </li> </ul> <p>4. The recovery process</p> <p>How the body returns to its pre-exercise state:</p> <ul style="list-style-type: none"> <li>- Excess Post-exercise Oxygen Consumption (EPOC)             <ul style="list-style-type: none"> <li>• Fast components of EPOC, the processes that occur and the duration:                 <ul style="list-style-type: none"> <li>- replenishment of blood and muscle oxygen stores</li> <li>- re-synthesis of ATP and PC</li> </ul> </li> <li>• Slow components of EPOC, the processes that occur and the duration:                 <ul style="list-style-type: none"> <li>- elevated circulation</li> <li>- elevated ventilation</li> </ul> </li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>- retroactive</li> <li>- bilateral</li> <li>• Know and understand the ways of optimising the effect of positive transfer</li> <li>• Know and understand the ways of limiting the effect of negative transfer.</li> </ul> <p>2. Principles and theories of learning movement skills</p> <ul style="list-style-type: none"> <li>• Theories of learning:             <ul style="list-style-type: none"> <li>- operant conditioning</li> <li>- cognitive theory of learning</li> <li>- Bandura's theory of social/observational learning.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Communications technology made great advances. This allowed ideas to spread rapidly and sports and pastimes to become more globalised.</li> <li>• There was more time for leisure, less time spent on work, and therefore more participated in sport.</li> <li>• Stress due to wars and terrorism, the undermining of traditional values and the rapid pace of life took a great toll on people's general health and well-being.</li> </ul> <p>2. Changes in socio-cultural factors</p> <p>3. Growth in spectatorship and money in sport</p> <p>4. Growth in professionalism</p> <p>5. Sport during the war</p> <p><b><u>21<sup>st</sup> Century Sport</u></b></p> <p>1. Characteristics:</p> <ul style="list-style-type: none"> <li>• High performance sport now a global product</li> <li>• Highly structured</li> <li>• It is 'big business' involving huge investment</li> </ul>
--	---	---

## Key Stage 5 Curriculum Map 2018-19

<ul style="list-style-type: none"> <li>- elevated body temperature</li> <li>- lactate removal and conversion to glycogen</li> <li>• Effect of exercise intensity on EPOC and implications of the recovery process for planning exercise or training sessions.</li> </ul> <p><b><u>Environmental Effects on Body Systems</u></b></p> <p>1. Exercise at altitude</p> <ul style="list-style-type: none"> <li>• Effect of altitude on the cardiovascular and respiratory systems:             <ul style="list-style-type: none"> <li>- reduced arterial PO<sub>2</sub> (partial pressure of oxygen) leading to impaired muscle O<sub>2</sub> delivery</li> <li>- elevated heart rate and ventilation</li> </ul> </li> <li>• Acclimatisation, including the importance of timing arrival, at altitude (above 2400m).</li> </ul> <p>2. Summer 1

Paper 1 – Exercise Physiology	Year 12 - Paper 2 – Skill Acquisition	Year 12 - Paper 3- Contemporary issues in physical activity & sport
<p><b><u>Preparation &amp; Training Methods in Relation to Improving and Maintaining Physical Activity &amp; Performance</u></b></p> <p>1. Aerobic Training</p> <ul style="list-style-type: none"> <li>• Aerobic capacity and maximal oxygen uptake (VO2max)</li> <li>• How VO2max is affected by:               <ul style="list-style-type: none"> <li>- individual physiological make-up</li> <li>- training</li> <li>- age</li> <li>- gender</li> </ul> </li> <li>• Methods of evaluating aerobic capacity:               <ul style="list-style-type: none"> <li>- laboratory test of VO2max using direct gas analysis</li> <li>- NCF multi-stage fitness test</li> <li>- Queen’s College step test</li> <li>- Cooper 12-minute run</li> </ul> </li> <li>• Intensity and duration of training used to develop aerobic capacity:               <ul style="list-style-type: none"> <li>- continuous training</li> <li>- high intensity interval training (HIIT)</li> <li>- the use of target heart rates as an intensity guide</li> </ul> </li> <li>• Physiological adaptations from aerobic training:               <ul style="list-style-type: none"> <li>- cardiovascular</li> <li>- respiratory</li> <li>- muscular</li> </ul> </li> </ul>	<p><b><u>Guidance</u></b></p> <ul style="list-style-type: none"> <li>• Types and uses of guidance:               <ul style="list-style-type: none"> <li>- verbal guidance</li> <li>- visual guidance</li> <li>- manual guidance</li> <li>- mechanical guidance</li> </ul> </li> <li>• Advantages and disadvantages of using each type of guidance.</li> </ul> <p><b><u>Feedback</u></b></p> <ul style="list-style-type: none"> <li>• Types and uses of feedback:               <ul style="list-style-type: none"> <li>- intrinsic</li> <li>- extrinsic</li> <li>- positive</li> <li>- negative</li> <li>- knowledge of performance</li> <li>- knowledge of results</li> </ul> </li> <li>• Advantages and disadvantages of using each type of feedback.</li> </ul> <p><b><u>Memory models</u></b></p> <ul style="list-style-type: none"> <li>• Atkinson and Shiffren’s multi-store memory model</li> <li>- use of selective attention</li> </ul>	<p><b><u>Hosting Global sporting events:</u></b></p> <p>1. The impacts of hosting a global sports events on the host country/city</p> <ul style="list-style-type: none"> <li>○ Sporting impacts</li> <li>○ Social impacts</li> <li>○ Economic impacts</li> <li>○ Political impacts</li> </ul> <p><b><u>Revision</u></b></p>

## Key Stage 5 Curriculum Map 2018-19

<ul style="list-style-type: none"><li>- metabolic</li><li>• Activities and sports in which aerobic capacity is a key fitness component.</li><li>2. Strength training<ul style="list-style-type: none"><li>• Types of strength:<ul style="list-style-type: none"><li>- strength endurance</li><li>- maximum strength</li><li>- explosive/elastic strength</li><li>- static and dynamic strength</li></ul></li><li>• Factors that affect strength:<ul style="list-style-type: none"><li>- fibre type</li><li>- cross sectional area of the muscle</li></ul></li><li>• Methods of evaluating each type of strength:<ul style="list-style-type: none"><li>- grip strength dynamometer</li><li>- 1 Repetition Maximum(1RM)</li><li>- press up or sit-up test</li><li>- vertical jump test</li></ul></li><li>• Training to develop strength:<ul style="list-style-type: none"><li>- repetitions</li><li>- sets</li><li>- resistance guidelines used to improve each type of strength</li><li>- use of multi-gym</li><li>- weights</li><li>- plyometrics</li><li>- circuit/interval training: – work intensity – work duration – relief interval – number of work/relief intervals</li></ul></li><li>• Physiological adaptations from strength training:<ul style="list-style-type: none"><li>- muscle and connective tissues</li><li>- neural</li><li>- metabolic</li></ul></li></ul></li></ul>	<ul style="list-style-type: none"><li>• Craik and Lockhart’s levels of processing model</li><li>• Relate both models to learning and performing physical activity skills.</li></ul> <p><u>Revision</u></p>
